(step D) TEMPERATURE REGULATION

(step E) DOSE REGULATION

(step F) INFUSION REGULATION

With the interface "Express yourself", the barista has total control of the extraction phase of his coffee and can manage each dispensing parameter according to his experience and professionalism.

To configure and set all the parameters of the machine, a specific App has been designed, which runs on tablet.

The application "Express yourself" utilizes a graphic interface, it is both user friendly and intuitive. This interface allows the user to set each groups relative parameters accurately for the perfect extraction.

Upon choosing the group (step A) and assigned a configured profile (step B,C) will define the general parameters of extraction: temperature and doses (step D,E). At the end it is possible to adjust the parameters relative of the 3 extraction's phases: pre-infusion, main infusion, post-infusion (step F).

For each group it is possible to set:

Temperature

- water temperature T2
- group temperature T3
- steam temperature T5 (unique boiler for all groups)

Dose

- weight of ground coffee
- water dose
- pump pressure
- coffee weight

Infusion

- timing
- pump pressure
- amount of water

Pre Infusion: 2.5 s

Infusion: 71 ml

Pressure: 9.0 bar

Post Infusion: 2 ml

3.5 bar

PRE-INFUSION

INFUSION

POST-INFUSION

(step F) Adjust the 3 extractions phases

This operation is simplified by the App. Everytime the user modify one of these parameter the software update automatically. What was set prior to the modification.

CONFIGURATIONS

- ... N (set by the user)

It is possible to save and recall new configurations set by the user or the default ones, specifically designed to allow even the less experienced bartenders to obtain immediately excellent results in the cup.

Clicking in "save new configuration" you can save your perfect espresso dispensing menu and transfer it into another machine.
